Subject: Serious Untoward Incidents year to date 2015

Q A list of all serious untoward incidents in the calendar year 2015 so far, for each hospital site you cover.

I would like these broken down by hospital site if you cover more than one hospital.

I would like the details of each incident to include:

- a) the date it occurred (or, if this is not easily possible, the date it was declared)
- b) a description of the incident (I appreciate details of individual patients may need to be redacted, but would like as much detail as you deem possible, e.g. for example "a male patient aged 65", or "a female patient aged 60-65")
- c) the outcome of the incident (ie what negative consequences followed), and
- d) the outcome of the internal investigation into the incident, including whether any disciplinary action has been taken.
