Subject: Use of Data Integration Technology

Q1 For the following question, we understand data integration technology to be a solution that automates the moving of data in near real time to a data warehouse, data lake or in the cloud.

Does your hospital have a data integration technology and what is it?

A1 No

Q2 For the following questions, we understand data analytics technology to mean software that aggregates and analyses data to identify patterns and deliver insights.

Which roles in the hospital currently have access to data analytics technology (please confirm for each of the following roles listed): Physician, Nurse, Pharmacist, Management, Accountant/Finance, HR and Recruitment, IT Office, Administrative Assistants, Data analyst/scientist (including roles such as Performance Reporting and Informatics)

A2 All colleagues have access

Q3 Of those that have access to data analytics technology, please confirm whether people in the following roles are able to access the technology on mobile devices (please confirm for each of the following roles listed): Physician, Nurse, Pharmacist, Management, Accountant/Finance, HR and Recruitment, IT Office, Administrative Assistants, Data analyst/scientist (including roles such as Performance Reporting and Informatics)

A3 Access is web based so laptops also provide access. We do not currently have App based access

Q4 If your data analytics technology is not available on mobile devices, please confirm whether people in the following roles must access it on desktop computers (please confirm for each of the following roles listed): Physician, Nurse, Pharmacist, Management, Accountant/Finance, HR and Recruitment, IT Office, Administrative Assistants, Data analyst/scientist (including roles such as Performance Reporting and Informatics)

A4 Information not held – not applicable as per A3 above
