Subject: Contact details - vital signs integration lead

Q1 I am trying to find the person responsible for the integration of vital signs data from medical devices to the hospital EPR and/or Clinical Systems.

I appreciate there may be many stakeholders, so to clarify, this may be someone in a clinical or IT role.

Could you advise me if this relevant to your role and if not, perhaps you could point me in the right direction?

Any information you can provide would be greatly appreciated.

A1 Responsibility falls within the remit of the EPR Manager's role:-

Carol Moss, EPR Manager, carol.moss@lhch.nhs.uk
