Date: 27 January 2021
Subject: NHS Improvement Model Health System

Q1 What have you done in the past 2 years with regard to the NHS Improvement Model Health System?

A1 We have used information in the Model Hospital (now Model Health System) to identify productivity opportunities, to benchmark ourselves against peers, and to identify opportunities for improvement. We have also used the tool to inform efficiency (CIP) targets.

Q2 What is the scope of your roadmap for the coming 2 years for the NHS Improvement Model Health System?

A2 The Model Health System will continue to be used to benchmark our performance, identify productivity and other improvement opportunities and to inform efficiency (CIP) targets. As plans across the Cheshire and Mersey Health and Care Partnership develop, we may use Model Health System to inform strategy and planning (and this may be jointly undertaken with other providers in the health economy) to ensure we improve quality and patient experience across the region.

Q3 Have any third-parties been involved or are currently involved in the Model Health System work within your trust?

A3 No
