From: Private Individual
Date: 26 May 2022
Subject: Number of probable and definite hospital acquired covid cases

Q1 Follow on from FOI202223/043

Can I ask for the split of that figure into probable and definite hospital acquired covid cases as defined by NHS England?

A1 Upon further review of your requests, we have found that our previously issued response for your original request had the wrong figures, for which we apologise.

The number of people who were infected with Covid-19 inside your hospital (those who tested positive for Covid-19 after testing negative when they were first admitted) from March 2020 until present = 114

Of this, the total number of Hospital Probable = 62
And the total number of Hospital Definite = 52

The number of people who after being infected with Covid inside the hospital, then died of or with the virus, whilst in hospital, or after discharge, from March 2020 until present = 13

Of this, the total number of Hospital Probable = 8
And the total number of Hospital Definite = 5

Date: 04 May 2022

Subject: number of patients who were infected with Covid-19 inside your hospitals and the number of people then died of or with the virus whilst in hospital or after discharge.

Q1 The number of people who were infected with Covid-19 inside your hospitals - so the patients who tested positive for Covid-19 after testing negative when they were first admitted from March 2020 until present. Please may I have the figures broken down for the number of hospital-acquired infections for each individual hospital.

A1 114

The Liverpool Heart and Chest Hospital NHS Foundation Trust is a single site hospital.

Q2 The number of people who after being infected with Covid inside the hospital, then died of or with the virus, whilst in hospital, or after discharge, from March 2020 until present. Please may I also have these figures broken down for the number of deaths for each individual hospital.

A2 13. These figures are patients who died whilst in hospital. We do not hold information regarding those who died after discharge.

The Liverpool Heart and Chest Hospital NHS Foundation Trust is a single site hospital.
