

**Reference Number:** FOI202324//090  
**From:** Other  
**Date:** 25 May 2023  
**Subject:** Number of patients diagnosed with Long QT syndrome in 2021-2022

**Q1** How many individuals were identified to have a CACNA1C gene change as a result of genetic testing during the year 2022 and during the year 2021?

**A1** Information not held – the Trust does not routinely collate or hold this information centrally as part of its management or performance data. In order to ascertain this data, the Trust would be required to access the health records of the individuals and as such the data is exempt under Section 40: Personal data

We advise you direct your request to the North West Genomics laboratory hub (NWGLH) as they provide genomic testing for the region. The Service is hosted by Manchester Foundation Trust:
