

Reference Number: FOI202223/102
From: Private Individual
Date: 22 June 2022
Subject: Hospital equipment - end-of-life process; disposal process and supplier, equipment details current and end-of-life

I would like to make a FOI information request regarding hospital equipment.

I would like to know (segmented by hospital):-

Q1 The process which the hospital follows for end-of-life equipment

A1 *As per the Trust [Medical Equipment Disposal Policy](#), attached*

Q2 The process by which the hospital decides that an equipment has reached its end of life

A2 *Equipment would be deemed end of life if it is beyond economical repair, if spares are no longer available to repair/service, if clinically it's no longer fit for purpose or it is no longer required for use.*

Q3 Which companies the hospital works with in order to dispose of / sell off / repurpose... medical equipment

A3 *Avensys*

Q4 The past data which the hospital has on where equipment has gone

A4 *Information not held - We don't record this information in a searchable format.*

Q5 The data on which medical equipment that the hospital has which is about to reach its end of life

A5 *Information not held - We don't record this information in a searchable format. End of life for equipment is flagged and managed by department and Medical Engineering Teams.*

Q6 The data on which medical equipment the hospital currently has, when it was sourced and where it was sourced from, at what price

A6 *Please see attachment - [LHCH Equipment List July 2022](#)*

In relation to cost - Information held however the time taken to collate the information would exceed 18 hours and the appropriate fees limit set by the Freedom of Information Act. In order to comply we would need to review each item listed, cross referencing with other information systems to provide the requested price and source from information. Given that the equipment list contains 10,120 entries this would we estimate take in excess of 800 hours (5 mins per item), therefore under Section 12 of the Freedom of Information Act the Trust is exempt from disclosing this information.

Model	Model Description	Brand	Purchase Date	Status

Procedure Statement

The trust has a Medical Equipment Policy, within it sections deal with condemnation and replacement of medical equipment. This procedure details the different scenarios that are approved for disposal of medical equipment and should be read in conjunction with the policy. All employees are required to follow this procedure and the policy.

1. Roles and Responsibilities

- **Departmental managers** When they decide a piece of medical equipment is no longer needed will be required to present unwanted medical equipment to MED with a fully completed tag as per the medical equipment policy, then complete a trust asset disposal form.
- Using data from the trust Medical Equipment Management Database (Equip), the asset disposal form and equipment manufacturer the **MED manager** will advise the **Deputy CFO** if equipment can be placed as suitable for possibly passing to the trusts recognised 3rd party (R3P) organisation to sell on and return funds to the trust managing the operational aspects of the transfer.
- **The Deputy CFO** will authorise the **MED manager** to do the above or decline. Where equipment is to be “gifted” (no financial gain to LHCH) to a 3rd party the **Deputy CFO** with the members of CMG will ensure that there is a clear document signed by the receiver agreeing that they will not use the equipment ever on any living person and should they do so they accept full responsibility for doing so at their own risk. That they are fully responsible for all repair, maintenance and safety testing both planned and reactive to the device. And that the receiver is fully responsible for paying the costs incurred for Storage, Transport, testing of the equipment directly to the trusts R3P.
- **The Head of Financial Accounts** and **procurement lead** will manage any financial aspects relevant to this procedure when advised by the **MED manager**.
- **R3P** Will test using their own MED engineers any equipment to OEM specification and then attempt to sell them as per the T&C's agreed April 2015.

2. Document Control Standards

All staff are expected to complete these procedures using the MED forms and databases to manage medical equipment through pre purchase evaluation, useful operation period and up to and including formal disposal.

3. Procedure

Upon deciding a piece of medical equipment is no longer needed.

1. Send the equipment to MED advising of such. Using the trusts tagging system which is detailed in the medical equipment policy.
2. MED will issue an asset disposal form to the relevant manager. Complete and return this to MED.

NB

Where the original purchase cost of the equipment is less than £4999 then 2 signatures are needed for the asset disposal, being relevant departmental senior manager and MED manager. Where the original purchase cost of the equipment is more than £4999 then the Deputy CFO must also sign the asset disposal.

Upon MED receiving the completed asset disposal form.

1. MED will review the equipment. If it is of no further use it will be disposed of within legislation, recommendations and guidelines that are in force at the time.
2. If the equipment is still operational MED will advise Deputy CFO of such. If Deputy CFO approves transfer to R3P MED will manage this. Recording all stages and advising finance dept.
3. If Deputy CFO doesn't approve transfer then 1 directly above here will suffice.
4. If no financial gain is required MED will liaise with R3P and the party that is receiving the equipment and advise Deputy CFO of the pertinent detail of that case so a decision can be agreed.
5. When the equipment is transferred to R3P a copy of the asset disposal will be sent in email by MED to Head of Financial Accounts.

All actions above being logged to unique identifiers within the Equip database.

4. Procedure Implementation Plan

This procedure will be approved by Corporate Governance and Risk Committee.

This procedure will be communicated across the above committee and via trust intranet as part of a procedure within the medical equipment policy.

5. Monitoring of Compliance

The procedure will be monitored, assessed and reviewed by the CMG annually.

6. Endorsed By:-

Name of Lead Clinician/ Manager or Committee Chair	Position of Endorser or Name of Endorsing Committee	Date

7. Record of Changes

Section Number	Version Number	Date of Change	Description of Amendment	Description of Deletion	Description of Addition	Reason
Throughout	1.1	Oct 20	Change of job title	COO	Deputy CFO	Change of management structure
1	1.1	Oct 20	Change of job title	Capital Accountant	Head of Financial Accounts	Change of responsibility
3	1.1	Oct 20	Added bullet point 5		Further action to complete.	Update to process to give Financial assurance.
