

**Reference Number:** FOI2021/118  
**From:** Private Individual  
**Date:** 16 April 2021  
**Subject:** Covid 19 Deaths and underlying health conditions data

I would like to request a Freedom of Information in relation to Covid 19 deaths following the NHS England update on 20th April 2020 in which they provided the breakdown of age and ethnicity which is helpful to the public and of course can be found online. More information is required so that the public have a right to know.

Q1 How many people have died in your hospitals due to Covid 19 alone? As in only died to Covid 19? Again I can see the figures you post online but these are deaths with 28 days of having a positive Covid test so they could have died of other causes. I just want to know the exact figure between February 1st 2020 to April 1st 2021 of people who died solely from Covid 19 and nothing else please.

A1 Six

Q2 The percentage and number of people with 'underlying health conditions' in the overall total.

A2 Information not held – the Trust does not routinely collate or hold this information centrally as part of its management or performance data.

Q3 The percentage and number of those without 'underlying health conditions'.

A3 Information not held – the Trust does not routinely collate or hold this information centrally as part of its management or performance data.
