

**Reference Number:** FOI202223/148  
**From:** Commercial  
**Date:** 21 July 2022  
**Subject:** The number of finished admission episodes on July 18, 2022 and July 19, 2022, with a primary or secondary diagnosis of T67 Effects of heat and light, L55 Sunburn and the number of occasions where an occupied ward or clinical area had a daily maximum temperature exceeded 26°C

Q1 The number of A&E attendances on July 18, 2022 and July 19, 2022, with a primary or secondary diagnosis of:  
a. T67 Effects of heat and light  
b. L55 Sunburn

A1 Information not held - Liverpool Heart and Chest Hospital is a specialist adult cardiothoracic centre and does not have an Accident and Emergency department.

Q2 The number of finished admission episodes on July 18, 2022 and July 19, 2022, with a primary or secondary diagnosis of:  
a. T67 Effects of heat and light  
b. L55 Sunburn

A2 a. Zero  
b. Zero

Q3 The number of occasions on July 18, 2022, and July 19, 2022, where an occupied ward or clinical area had a daily maximum temperature exceeded 26°C. Please include each occupied ward or clinical area having a daily maximum of over 26°C as one incident (e.g. if two wards exceeded the daily maximum temperature for two days and one clinical area exceeded the threshold for one day then the number of occasions to be reported is five).

A3 Zero
