

Reference Number: FOI2021/164
From: Private Individual
Date: 11 May 2021
Subject: Supplier of E-Observation system, hospital pager system and remote monitoring system

Q1 The name of the supplier of your E-Observation system?

'The system, which is called 'E-Obs', is a digital solution to record the vital signs of a patient. A mobile device is used by the nursing staff to collect and store patient observations, creating a score that can assist in making clinical judgments when treating a patient.'

A1 Information not held - we do not use an E-observation system. Our EPR records and creates a score for vital signs.

Q2 The name of the supplier of your onsite hospital pager system (to help manage patient flow)?

'onsite hospital pager systems allow the hospital to carefully manage patient flow throughout the patients visit.'

A2 Stanleys. This system is supplied by Liverpool University Hospitals NHS Foundation Trust (LUFT)

Q3 Does your Trust currently use remote monitoring?

'Often abbreviated as RPM (and sometimes known as remote patient management), remote patient monitoring is a method of healthcare delivery that uses the latest advances in information technology to gather patient data outside of traditional healthcare settings.'

A3 No

Q4 The name of the supplier of your Remote monitoring system?

A4 Information not held – as per A3 above
