

Reference Number: FOI/2020/183
From: Commercial
Date: 06 July 2020
Subject: Vital Signs Data

- Q1 I would like to understand how the trust currently integrates vital signs information from medical devices with its core clinical systems.
Specifically, if the patient's vital signs are collected by nurses and then typed into the system using an electronic hand held device or if the data is automatically collected from the devices and sent electronically into the EPR?
- A1 The patients Vital Signs are collected on Mindray devices and sent via Interface messages into the Trust EPR system, they are then verified in EPR using Mobile Carts.
- Q2 Will your current process be something on your radar to make changes to, especially with regards to the management of Covid?
- A2 There are currently no plans to change the process.
