

Reference Number: FOI/2019/191
From: Commercial
Date: 09 May 2019
Subject: Symptomatic aortic stenosis referrals and Transcatheter Aortic Valve Implantation (TAVIs)

Q1 How many referrals did you received for symptomatic aortic stenosis from 1st April 2018 – 31st March 2019?

A1 Information not held - the Trust does not routinely collate or hold this information centrally as part of its management or performance data. The table below however below shows the outcomes of referrals for TAVI:

How many referrals for TAVI did you receive in 2018/2019?	11.2	403
What was the outcome of your assessment of these referrals for TAVI in 2018/2019?		Number
TAVI		210
Surgical treatment		34
Medical management		151
Other		7
Total		403

Q2 Of those referrals in question 1, how many were offered a Transcatheter Aortic Valve Implantation (TAVI)

A2 See above

Q3 Of those offered a TAVI in question 2, how many were recommended by the:
a. Interventional cardiologist?
b. Cardiothoracic surgeon?

A3 100% - all MDT'd by both surgeon and interventional cardiologist

Q4 What was the average waiting time for patients undergoing TAVI between 1st April 2018 – 31st March 2019?

A4 Approximately 5-6 months

Q5 How many patients were removed from your Trust's TAVI waiting list due to death between 1st April 2018 – 31st March 2019?
