Subject: Income from Private Treatment

I would be grateful if you would supply me with the following information regarding The Rowan Suite:

Q1 Your current price list for private patient elective procedures and treatments

A1 Please see attachment – *LHCH Private Patient Tariff Self Pay 2021-22*

Q2 Your private patient income for the year 2019/20 segmented as follows –
a. Income from UK insured patients
b. Income from UK self-pay patients
c. Income from overseas/international patients

A2 Information exempt under Section 21 of the Freedom of Information Act 2000 - 'Information reasonably accessible to the applicant by other means'.

This information is available on our website, it can be found in our Annual Reports and Accounts under Section 3 Annual Accounts; Note 3.2 Income from Patient Care Activities (by source):
<http://www.lhch.nhs.uk/about-lhch/performance-plans-and-publications/annual-reports-and-accounts/>

Information not held – A breakdown of insured and self-pay patients is not available as this information is not recorded separately.

Universal Charges

This is the tariff for universal charges not listed elsewhere.

CCSD Code	HRG4+	CCSD Procedure Name	Tariff
		Outpatient first attendance (registration fee)	£ 50
		Daycase admission (no procedure/medical management)	£ 250
		Inpatient admission (no procedure/medical management)	£ 350
	WF01B	Physiotherapy First Attendance	£ 75
	WF01A	Physiotherapy Follow-up	£ 50

Critical Care & Ward – additional stay

This is the tariff for critical care treatment for patients in excess of the standard length of stay included in procedure packages prices (usually upto 2 days).

CCSD Code	HRG4+	CCSD Procedure Name	Tariff
AA234	XZ04Z	Intensive Care Unit - Critical Care Level 3	£ 1,696
AA256	XZ05Z	High Dependency Care - Critical Care Level 2	£ 1,182
		Inpatient ward - daily tariff	£ 350

Multiple Inpatient/Daycase Procedures

When a patient undergoes multiple procedures within the same admission then we will always seek to make this known to the patient before they are admitted and include it in the quotation provided.

In some situations this is not always possible, for example the additional procedures are not known in advance or the clinical condition of the patient changes during their admission. Wherever possible we will seek agreement in advance for additional treatment.

Our tariff for multiple procedures mirrors that used widely in the healthcare insurance field, and recognises that multiple procedures can provide cost savings over separate procedures.

Multiple procedures taking place in the same admission and the SAME theatre/cath lab sessions:

We will discount the second and subsequent procedure tariff to reflect the economies of scale in the ward and theatre costs:

- 100% of the tariff for the main procedure (which is the most expensive procedure)
- Then 50% of the tariff for the second procedure.
- Then 25% of the tariff for the third, and each subsequent procedure.

Devices for subsequent procedures that are not included in the main procedure tariff are charged separately.

Multiple procedures taking place in the same admission but in SEPARATE theatre/cath lab sessions:

We will discount the second and subsequent procedure tariff to reflect the economies of scale in the ward costs only:

- 100% of the tariff for the main procedure (which is the most expensive procedure)
- Then 75% of the tariff for the second procedure.
- Then 50% of the tariff for the third and each subsequent procedure.

Devices for subsequent procedures that are not included in the main procedure tariff are charged separately.

A confirmed price tailored to individual patient circumstances must be provided by the private patients team prior to arranging treatment.

Diagnostics - Respiratory

This is the tariff for respiratory investigations performed on an outpatient basis.

Tariff does not include consultant fees unless stated.
