

Reference Number: FOI/2020/294
From: Press/Media
Date: 19 October 2020
Subject: Number of beds, number of both whipple procedures (pancreaticoduodenectomy) and liver transplantation procedures

Q1 Total number of physical beds for each hospital

A1 184

Q2 Number of healthcare professionals in each hospital responsible for carrying out whipple and/or liver transplant procedures

A2 Information not held - Liverpool Heart and Chest Hospital is a specialist adult cardiothoracic centre and does not perform these procedures.

Q3 The following three parameters regarding whipple procedures (pancreaticoduodenectomy) and liver transplantation:

- Number of procedures performed in 2019
- Number of procedures performed in 2020 so far
- Complication rate for 2019 procedures in %

For clarification, when I am asking for the complication rates of the Whipple procedure, I am referring to complications such as leak post operation. The complication I am interested in for liver transplants is the rejection of the implanted liver.

A3 Information not held - as per A2 above.
