

## **Gender Pay Gap – March 2019**

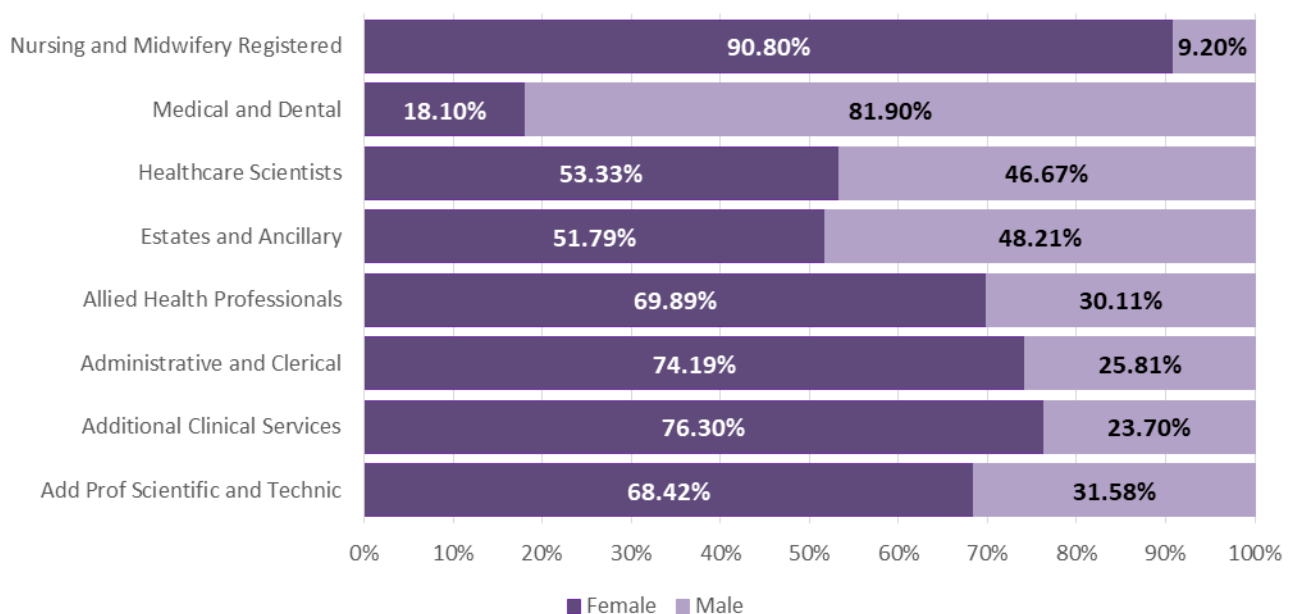

The following report provides Liverpool Heart and Chest 'Gender Pay Gap' report using data from ESR at the snapshot date 31/03/2019. Gender pay gap shows the difference in Mean (Average) and Median (Mid-point) pay between all men and women in the workforce. Gender pay gap is different from Equal pay as this deals with the pay differences between men and women who carry out the same jobs, similar jobs or work of equal value.

Data is based on 1591 eligible staff employed at LHCH at snapshot date of 31/03/2019 – 92.71% of staff in this sample are on Agenda for change terms and conditions. The highest proportion of staff within the Trust are 'Registered Nursing' staff who represent 31.43% of the Trust total. Grades have a set of paypoints for annual progression therefore the longer period of time that someone has been in a grade the higher their salary is likely to be irrespective of their gender.

### **Gender Profile:**

### **Gender Profile by Staff Group:**

Females represent almost 91% of Nursing and Midwifery Registered staff with female representation in A&C and Additional Clinical Services all above 70%. The remainder are between a 18% and 69% split. Medical and Dental is predominantly Male with 81.90% of staff.

## Pay Gap – Ordinary Pay

Data is based on snapshot of all paid staff in March 2019 or Week 52 2019 for weekly paid staff (Bank staff).

Women's Hourly Rate Gap is:	
<b>28.17%</b> lower than men which equates to £6.24 (Mean)	<b>6.77%</b> lower than men which equates to £1.04 (Median)

Mean (or average) is based on hourly rate of ordinary pay including Basic Pay, Allowances and Shift Premium pay.

Median (or mid pay) is based on hourly rate of ordinary pay including Basic Pay, Allowances and Shift Premium pay.

Calculating using Mean can be affected by outliers (for example higher paid Consultants who receive Clinical Excellence Awards), so we would say that Median is a fairer representation for GPG. See example of variation of hourly pay by Mean/Median if we removed Consultants from the initial calculations.

Gender	Median <u>including</u> Consultants	Median <u>excluding</u> Consultants	Average <u>including</u> Consultants	Average <u>excluding</u> Consultants
Female	£14.34	£14.34	£15.92	£15.51
Male	£15.39	£14.29	£22.17	£16.52
Difference £'s	£1.04	-£0.05	£6.24	£1.01
Difference %	6.77%	-0.35%	28.17%	6.12%

Office for National Statistics\* publication in 2019 estimates that the Public Sector Gender Pay Gap is 16.20% (Mean Gap) / 17.30% (Median)

<https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/earningsandworkinghours/datasets/annualsurveyofhoursandearningsashegenderpaygaptables> File: PROV - Total Table 1.12 Gender pay gap 2019

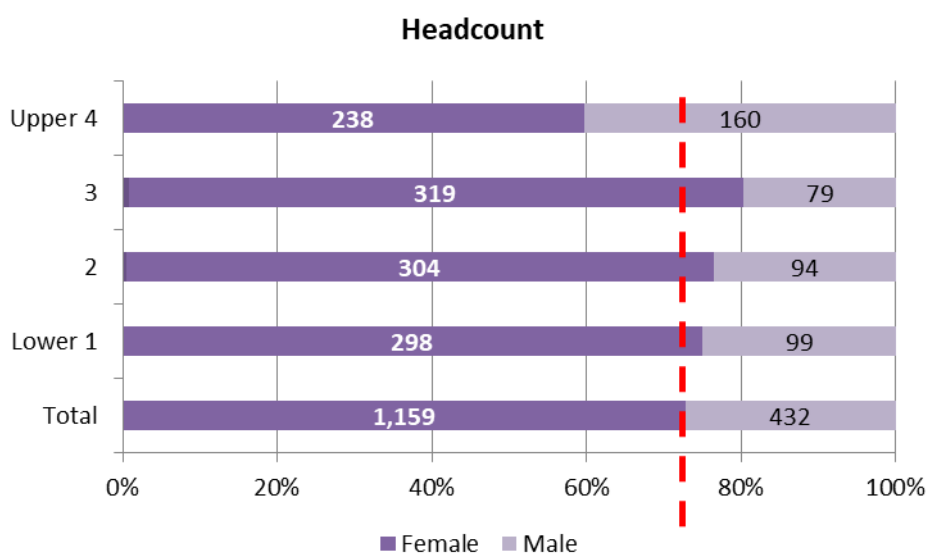

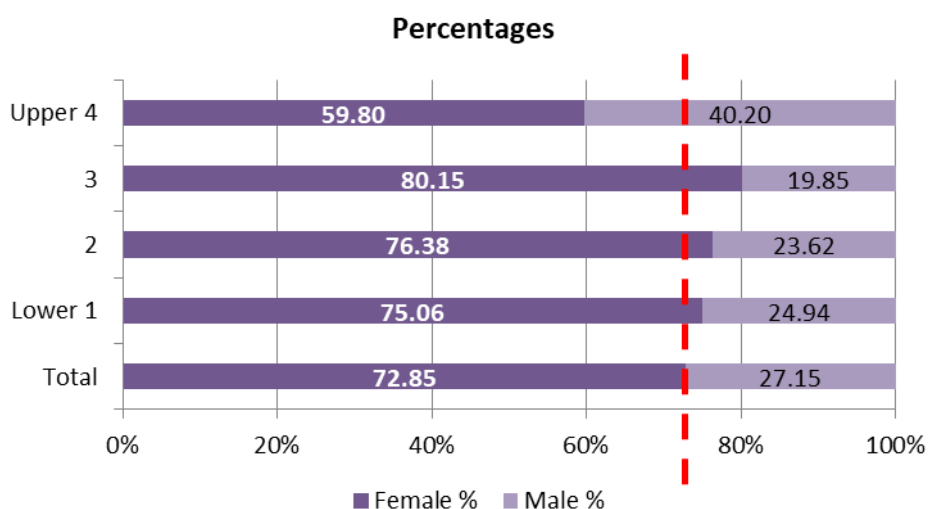

**Pay bands:** The table below shows Pay Gap by Banding:

Men earn more than Woman in the following Bands		Women earn more than Men in the following Bands	
Band	PayGap	Band	PayGap
Band 2	3.79%	Band 4	0.46%
Band 3	2.06%	Band 5	0.96%
Band 8a	7.76%	Band 6	3.05%
Band 8c	11.52%	Band 7	7.15%

Band 8d	5.76%	Band 8b	0.19%
Medical	12.70%	Adhoc	134.48%

## Hourly Pay Quartiles:

An extract from ESR is used to rank male and female staff in order of hourly pay. These are split into 4 quarters based on hourly pay groupings (Quartile 1 is the lowest). The following graph shows the Gender split by Percentage's and Headcount for each of the quartiles.

Compared to the Trust average Women are over represented in quartiles 1, 2 and 3 and under represented in Quartile 4 by just over 13.05%.

Quartile 3: Medical & Dental and Nursing Registered account for 62.31% of the Staff Groups (of which 56.28% female / 6.03% male)

Quartile 4: Medical & Dental and Nursing Registered account for 64.57% (of which 37.44% female / 27.14% male)

Percentage of staff in each Quartile split by Gender:

Quartile	% of All Females in each Quartile	% of All Males in each Quartile
Lower 1	25.71	22.92
2	26.23	21.76
3	27.52	18.29
Upper 4	20.53	37.04
Total	100.00	100.00

## Pay Gap – Bonus\* Payments

*\*Only includes 'Clinical Excellence Awards' and 'Discretionary Points'*

Women's Bonus Pay Gap is:	
<b>63.16%</b> lower than men (Mean)	<b>66.67%</b> lower than Men (Median)

(Data based on 5 Female / 37 Male)

Who received Bonus Pay:	
<b>0.38%</b> of Women	<b>7.84%</b> of Men

(Data based on 5 Females out of 1327 / 37 Males out of 472)

The Pay Gap is high between Male/Female staff due to the smaller range of bonuses\* paid to the 5 female staff - ranging from £3k to £9k compared to the range paid to Male staff of £3k to £59.5k. This is reflected in the figures above.

## Summary:

Factors Contributing to Gaps shown in this report:

- High proportion of women in the workforce (72.85%)
- Nursing Registered accounting for 31.43% of total staff and within this data, of whom 81.40% are Bands 5 & 6
- Males are a much higher proportion in Medical and Dental Posts (81.90%).
- Median for Males has decreased from £15.61 to £15.38 since the last report.  
Over the coming months, we will be looking at the actions we can take to address the disparity between women and men who work for us.
