## Key Points for Staff

- Risk is the effect of uncertainty on the delivery of objectives and refers to any variation on the expected or desired objective or outcome. For example, we have an objective to keep patients and staff safe at all times, risk is therefore anything that is stopping or could stop us from keeping people safe whilst in our care. The primary purpose of risk management is to:
  - Reduce harm for patients, staff, visitors or contractors;
  - Promote the success of Liverpool Heart and Chest Hospitals NHS Foundation Trust
  - Protect everything of value to the Trust (such as reputation, market share, exemplary clinical outcomes); and
  - Continuously improve patient experience, safety and quality performance.
- When identifying risk we anticipate what could stop us from achieving our objectives or goals. To help identify areas of risk we look at our historical performance and trends, previous events, current challenges, and needs of people who use our services as well as thinking about future scenarios or potential outcomes that could help or hinder the delivery of our plan. We are all required to be open, honest, think ahead and take an active part in identifying risk.
- Risk analysis involves estimating the severity (the impact the risk has on the Trust and people in our care) and likelihood (the probability or chances of that impact happening). The scores are multiplied to give an overall risk rating. The risk rating is used to determine risk management priorities and monitor acceptable amounts of risk. Colleagues are required to challenge constructively any assumptions made regarding severity and likelihood, and to strive to ensure risk is kept within agreed tolerance (i.e. under target).
- Risk is treated proactively using a combination of prevention, detection and contingency controls. **Prevention / Treatment** controls help to stop risks becoming reality or worsening through ensuring activities are performed in a certain way. They are typically policies, clinical or operational procedures, guidelines, training or computer systems. **Detection** controls alert management to any deficiencies preventing risk and typically involve performance monitoring, audits, alarms or tests. **Contingency** controls are designed to allow the Trust to recover from a failure to manage risk and allow the Trust to continue to function albeit in a modified way. Colleagues are required to understand and implement all controls designed to manage risk at the Trust.
- Organisational learning is reflected in the Trust's ability to continuously reduce the frequency of the same adverse event (near miss, incident, complaint or claim) occurring, and continuously improve performance. Controls are monitored and continuously improved as part of an open and learning culture.
- Risk management is everyone's responsibility. This policy applies to all Trust employees, contractors or volunteers working at the Trust.

## AT A GLANCE: THE RISK MANAGEMENT PROCESS

# 1 Introduction

- 1.1 This document is the policy for the management of risk at Liverpool Heart and Chest Hospitals NHS Foundation Trust. Risk management is an integral component of the Trust's Quality Governance Framework. By complying with the organisational arrangements described in this document, services will ensure the effective identification, assessment and control of risk thereby promoting and supporting the achievement of objectives.
- 1.2 The achievement of the Trust's strategic objectives is subject to uncertainty, which gives rise to both opportunities (desirable risk) and threats (undesirable risk). Uncertainty of outcome helps to define risk. Risk management includes identifying and assessing risks, and responding to them in an effective and resilient manner.
- 1.3 At all times the Trust will take all reasonably practicable steps to protect patients, staff, visitors and contractors from the risk of harm.
- 1.4 The Trust's governance framework shall be supported by an effective risk management system that delivers continuous improvements in safety and quality, and maximises opportunity for growth and development. Risk management provides a solid foundation upon which to build a culture of high reliability wherein clinical and organisational excellence can flourish. This supports the Trust's vision to "be the best".

# 2 Objective

- 2.1 The overall purpose of risk management at the Trust is to:
  - a) **Reduce the level of exposure to harm for patients, colleagues or visitors** by proactively identifying and managing personal risk to a level as low as reasonably practicable
  - b) **Promote success and protect everything of value** to the Trust, such as high standards of patient care, safe working environment, the Trust's safety record, reputation, community relations, equipment or sources of income
  - c) **Continuously improve performance** by proactively adapting, remaining resilient to changing circumstances or events, and learning.
- 2.2 The Trust will establish an effective risk management system which ensures that:
  - All risks that have a potential adverse effect on quality of care, safety and wellbeing of people, and on the business, performance and reputation of the Trust are proactively identified and managed well
  - Priorities are determined, continuously reviewed and expressed through objectives that are owned and understood by all staff
  - Effective controls are put in place to manage risks, and treating (reducing) risks is understood by those expected to apply control
  - All staff have a responsibility to comply with controls, whilst the operation of controls is monitored by management
  - Gaps in control are identified and rectified by management
  - Management are held to account for the effective operation of controls
  - Assurances are reviewed regularly and acted on (frequency depending on severity of risk)
  - Staff continuously learn and adapt to improve safety, quality and performance
  - Risk management systems and processes are embedded locally across Divisional teams and in corporate services including business planning, service

development, financial planning, project and programme management and education

2.3 The Trust shall achieve this by:

- Developing and driving a clear strategy to meet the needs of the patients and the wider public
- Actively engaging openly with patients and the public, colleagues and stakeholders
- Anticipation of opportunities or threats and responsive adaptation through an explicit risk management process
- Regular, effective and sufficient assessments of risk are carried out in all areas of the Trust's operations
- Providing training to keep risk under prudent control
- Investigating thoroughly, learning and acting on defects in care
- Liaising with enforcing authorities, regulators and assessors
- Effective oversight of risk management through team and committee structures
- Formulation and implementation of policies and procedures for all significant hazards arising from the Trust's undertakings
- Effective reporting and arrangements to hold staff to account
- Defining the Trust appetite for risk which can then be used by staff to set targets to the management of risk

### 3 Scope of Policy

3.1 **Risk management is everyone's responsibility.** This Policy applies to all employees, contractors and volunteers. All employees are required to co-operate with the Trust in managing and keeping risk under prudent control. Specific responsibilities are placed on members of the management team for ensuring the requirements of this policy are met within their respective areas of control. These are summarised under specific and generic responsibilities on pages 10-11.

3.2 Effective employee engagement is vital to our success and vision to provide care all of us would recommend to family and friends. Our values and behaviours set out "*the way we do things around here*" and these guide our work patients, colleagues and stakeholders. Our guiding values and behaviours are:

- Be innovative
- Promote best practice and share knowledge
- Always seek to improve
- Right first time, every time
- Be the best at what you do
- Be a team player
- Protect Dignity
- Treat everyone as an individual
- Listen and communicate carefully
- Be friendly, courteous and attentive
- Be respectful
- Inspire confidence
- Champion infection prevention
- Keep the hospital clean and tidy
- Learn from mistakes
- Recognise and reduce hazards

- 3.3 By wholeheartedly embracing our values and behaviours in all risk management activity, this policy supports high performance and fosters a culture that is confident about resilience; respects diversity of opinion; involves staff, patients and partners in all that we do; and improves capacity to manage risk at all levels of the organisation.

## 4 Policy

### THE RISK MANAGEMENT PROCESS

#### 4.1 Step 1: Determine Priorities

Risk is defined as the effect of uncertainty on the objective<sup>1</sup>; or in other words it is anything that is stopping or could prevent the Trust from providing safe and sustainable clinical services, and from being successful ([for a summary of key terms used in this document see Appendix 1](#)). The Board of Directors and Senior Management will be clear about objectives. These will be expressed in the form of an annual plan in specific, measurable, achievable ways with clear timescales for delivery. These are shared with staff each year through the Executive Roadshows.

#### 4.2 Step 2: Identify Risk

Evaluating what is stopping, or anticipating what could prevent, the Trust from achieving stated objectives/strategic priorities, annual plans, financial plans, delivering safe clinical services will identify risk. Risk identification concerns future events; it involves anticipation of failure and is based upon consideration of strengths, weaknesses, opportunities or threats. The identification of risk is an ongoing process and is never static, but is particularly aligned to the annual planning process and compliance requirements. Staff may draw on a systematic consideration of reasonably foreseeable failures alongside incident trends, complaints, claims, patient/staff surveys, observations, formal notices, audits, clinical benchmarks or national reports to identify risk. This list is not exhaustive. In order to do this the Board of Directors, senior leaders and divisional teams should identify what is uncertain, consider how it may be caused and what impact it may have on the objective and service.

#### 4.3 Step 3: Assess Risk

Estimate the magnitude of a risk by multiplying the severity of impact by the likelihood of the risk occurring. Be realistic in the quantification of severity and likelihood and use, where appropriate, relative frequency to consider probability. A [guide to calculating residual risk](#) and [risk scoring matrix](#) guidance is provided in appendices 2 and 3.

#### 4.4 Step 4: Respond to the Risk

There are a number of different options for responding to a risk<sup>1</sup>. These options are referred to as risk treatment strategies. The main options most likely to be used include:

- **Seek** - this strategy is used when a risk is being pursued in order to achieve an objective or gain advantage. *Seeking risk must only be done in accordance with the Board's appetite for taking risk.* For example, the Board

---

<sup>1</sup> Based on BSI (2008) *Risk Management - Code of Practice*. BS 31100:2008. London. British Standard International

may approve the investment of significant time and resources to evaluate a new business opportunity when there is no certainty the opportunity may come to LHCH.

- **Accept** - this strategy is used when no further mitigating action is planned and the risk exposure is considered tolerable and acceptable. Acceptance of a risk involves maintenance of the risk at its current level (any failure to maintain the risk may lead to increased risk exposure which is not agreed).
- **Avoid** - this strategy usually requires the withdrawal from the activity that gives rise to the risk.
- **Transfer** - this strategy involves transferring the risk in part or in full to a third party. This may be achieved through insurance, contracting, service agreements or co-production models of care delivery. *Staff must take advice from the Executive Team before entering into any risk transfer arrangement.*
- **Modify** - this strategy involves specific controls designed to change the severity, likelihood or both. This is the most common strategy adopted for managing risk at the Trust. For this reason, we expand on the nature of control as follows:

There are three types of control used to modify risk and comprise of:

- (i) **Prevention/Treatment** - these controls are core controls and are designed to prevent a hazard or problem from occurring. They typically involve policies, procedures, standards, guidelines, training, protective equipment/clothing, pre-procedure checks etc.
- (ii) **Detection** - these controls provide an early warning of core control failure, such as a smoke alarm, incident reports, complaints, performance reports, audits
- (iii) **Contingency** - these controls provide effective reaction in response to a significant control failure or overwhelming event. Contingency controls are designed to maintain resilience.

A combination of all 3 types of control is usually required to keep risk under prudent control.

#### 4.5 **Step 5: Report Risk**

All risks shall be recorded on the Trusts Risk Registers. Key outputs from the risk management system shall be reported to relevant staff/committees depending on the residual risk score as follows (**see appendix 4**):

- $\geq 15$  – each formal meeting of the Board of Directors
- $\geq 10$  – Risk Management & Corporate Governance Committee as part of the Committee's annual work plan
- $\geq 8$  – Specialty/Divisional /Departmental Governance meeting at least quarterly
- $\geq 6$  – Ward/Departmental Management at least annually

The **Board of Directors** shall receive summary reports at each formal meeting to inform them of all material risks. The risk profile shall be part of the Chief Executive's report and cover as a minimum the description of the risk, the residual risk and main controls.

The **Quality Committee** and the **Integrated Performance Committee** are the assurance committees of the Board. They receive risks escalated from the Operations Board (see section 4.7).

The **Operations Board** receive a regular update on risks scoring  $\geq 10$  from the Risk Management and Corporate Governance Committee via the Corporate Risk Register.

The **Risk Management and Corporate Governance Committee** is a sub-committee of the Operations Board. It will receive reports to monitor the quality, completeness and utilisation of risk registers, and also to oversee the distribution of risk across the Trust. Reports will cover the risk description, the residual risk (exposure after control), main controls, date of review and risk owner.

The Board of Directors Committee structure is shown in appendix 5.

**Divisions** will have access to PRISM and receive system generated Division specific reports in order to review the identification of risks within their wards, departments and specialties, and check that adequate controls are in place and actions are being implemented.

**The Executive Team** will be informed by the Director of Research & Informatics of any new significant risk arising at the first meeting opportunity.

**The Audit Committee** will scrutinise assurances on the entire risk management system to ensure it remains fit for purpose and, at the Committee's discretion, will examine assurances on the operation of controls for all significant risk exposures or any other risk of interest to the Committee.

**Urgent Escalation** - in the event of a significant risk arising out with meetings of the above, the risk will be thoroughly assessed, reviewed by the relevant Clinical Lead, Assistant Director of Nursing, Divisional Manager and Executive Director and reported to the Chief Executive (or their deputy) within 24 hours of becoming aware of the risk. The Chief Executive, with support from relevant members of the Executive Team and advisors, will determine the most appropriate course of action to manage the risk. The Chief Executive will assign responsibility to a relevant Executive Director for the management of the risk and the development of mitigation plans. Progress will be formally reviewed by the Executive Team at their next weekly meeting.

#### 4.6 **Step 6: Review Risk**

Review risk at a frequency proportional to the residual risk. Discretion regarding the frequency of review is permitted. As a guideline it is suggested, as a minimum, risk is reviewed as follows (**appendix 4**):

- $\geq 15$  – at least monthly
- $\geq 10$  – at least quarterly
- $\geq 8$  – at least bi-annually
- $\leq 6$  – annually.

Risk should be reviewed against the Boards expressed appetite for risk. If the residual risk exceeds the appetite threshold ([appendix 6](#)), additional or strengthened controls should be implemented.

#### 4.7 **The Committees of the Board**

The totality of the Trust's risk governance infrastructure includes the oversight provided by Board committees in their risk-related roles. Committees of the Board of

Directors play a vital role in effective risk management and shall apply the following principles to enable the Board to keep risk under prudent control at all times:

- a) oversee and advise the Board on current risk exposures and future risks to the Trust's strategy;
- b) oversee risk appetite and tolerance for those areas under the Committees purview;
- c) address risk and strategy simultaneously taking into account assurance on the operation of control, the current and prospective macro-economic, public policy and financial environment;
- d) challenge the Trust's analysis and assessment of risk;
- e) advise the Board on risk treatment and strategy;
- f) oversee due diligence appraisal of any proposed strategic transactions involving acquisition, merger or disposal;
- g) evaluate risk management capability;
- h) examine risks associated with emerging regulatory, corporate governance and industry best practices; and
- i) consult experts to optimise risk treatment where necessary.

## 5 Roles and Responsibilities

In order to achieve the aims of the Risk Management Policy the following roles, accountabilities and responsibilities apply:

### Specific Duties & Responsibilities

- 5.1 **Chief Executive**, as Accounting Officer, has overall accountability to the Board of Directors for effective risk management. The Chief Executive is responsible for ensuring priorities are determined and communicated, risk is identified and managed in accordance with the Board's appetite for taking risk.
- 5.2 **Director of Research & Informatics (Chief Risk Officer)** on behalf of the Chief Executive is the Board lead for risk management processes across the Trust. They shall, on behalf of the Board, implement and maintain an effective system of risk management. The Chief Risk Officer is responsible for: (i) risk management policy development; (ii) developing and communicating the Board's appetite for taking risk; (iii) establishing mechanisms for scanning the horizon for emergent threats and keeping the Board sighted on these; and (iv) monitoring the management of risk across Divisions. In the event of unsatisfactory compliance with the risk management process or unacceptable risk exposure, the Chief Risk Officer shall escalate the matter to a relevant Executive Director for their immediate attention and action.
- 5.3 **All Executives, Divisional General Managers, Associate Medical Directors, Clinical Leads, Assistant Directors of Nursing and Heads of Departments/Wards** have a specific responsibility for the identification and prudent control of risks within their sphere of responsibility. They shall intervene robustly to ensure teams within their sphere of control follow the risk management process. In addition, executive directors, clinical and all other directors shall also be responsible, where required, for the provision of specialist advice to the Board of Directors. This acknowledges that all directors are subject matter experts and have specific responsibilities for interpreting and applying national policy, legislation and regulations in respect of their specific areas of expertise.
- 5.4 **Risk Manager** - has day-to-day responsibility for risk management process, quality governance and safety management. They shall report to the Chief Risk Officer for:

(i) the development of risk management policy; (ii) administration of risk management systems; (iii) oversight of risk exposures facing the business; (iv) provision of risk management training and support to Divisions; and (v) the maintenance of the corporate risk/safety management plan. They shall be responsible for the maintenance and reporting of the Corporate Risk Register and carry out sufficient checks within and across Divisions to monitor the management of risk alongside the Board's appetite for taking risk. They shall be responsible for the effectiveness of the PRISM system, a governance system on which the Board depend, taking whatever action is necessary with colleagues, or the system Vendor, to ensure its effectiveness, validity, data quality and data completeness. The Risk Manager shall take the lead in triangulating lessons for learning ensuring defective arrangements, alerts or changes in practice are conveyed to front line teams promptly and acted upon.

- 5.5 **Associate Director of Corporate Affairs** – is the lead officer for the BAF supported by the executive directors. The Associate Director of Corporate Affairs is responsible for the co-ordination and the updating of the BAF, ensuring that the information is reported appropriately.

## GENERIC DUTIES AND RESPONSIBILITIES

Main Duties	Board of Directors	Executive Director	Divisional GM's, AMD's, Clinical Leads, Assistant Directors or Nursing & Heads of Departments/Wards	Other Managers	All Employees
Strategy & Policy	<ul style="list-style-type: none"> <li>Determine the Trust's vision, mission and values</li> <li>Set corporate strategy</li> <li>Provide leadership</li> </ul>	<ul style="list-style-type: none"> <li>Develop and oversee the implementation of strategic plans</li> <li>Develop and communicate corporate objectives</li> <li>Proactively anticipate risk</li> <li>Provide leadership and guidance to employees, business partners and stakeholders</li> </ul>	<ul style="list-style-type: none"> <li>Develop and Implement Clinical Strategy</li> <li>Alignment of divisional objectives to Trust strategy</li> </ul>	<ul style="list-style-type: none"> <li>Alignment of team/personal objectives to Trust strategy</li> </ul>	<ul style="list-style-type: none"> <li>Deliver personal objectives</li> <li>Abide by <b>Trust values and behaviours</b></li> </ul>
Organise	<ul style="list-style-type: none"> <li>Establish an effective risk management system</li> <li>Establish and keep under review the Board's appetite for taking risk</li> <li>Focus on material risk and proactive anticipation of future risk</li> </ul>	<ul style="list-style-type: none"> <li>Develop &amp; apply Risk Management Process</li> <li>Accept and allocate ownership for risk</li> <li>Share ownership for cross-enterprise risk</li> </ul>	<ul style="list-style-type: none"> <li>Apply Risk Management Process</li> <li>Accept and allocate ownership for risk</li> <li>Proactively anticipate risk</li> <li>Provide leadership and guidance</li> </ul>	<ul style="list-style-type: none"> <li>Apply Risk Management Process</li> <li>Accept and allocate ownership for risk</li> <li>Proactively anticipate risk</li> <li>Provide leadership and guidance</li> </ul>	<ul style="list-style-type: none"> <li>Follow Risk Management Process</li> <li>Accept ownership for risk</li> </ul>
Plan & Control	<ul style="list-style-type: none"> <li>Decide what opportunities, present or future, the Board wants to pursue and what risks it is willing to take in developing the opportunities selected</li> <li>Routinely, robustly and regularly scan the horizon for emergent opportunities and threats by anticipating future risks</li> <li>Decide whether or not a risk can be accepted</li> <li>Simultaneously drive the business forward whilst making decisions which keep risk under prudent control</li> </ul>	<ul style="list-style-type: none"> <li>Design, apply and monitor the operation of controls to ensure the achievement of objectives and promote organisational success</li> <li>Ensure failure does not disable – contingencies are in place and tested for all reasonably foreseeable situations</li> <li>Allocate, structure and prioritise resources within and across divisions or Divisions so that risk is managed in accordance with the Board's risk appetite.</li> </ul>	<ul style="list-style-type: none"> <li>Design and apply controls to manage risk in line with the Board's appetite for taking risk</li> <li>Prepare risk management mitigation plans</li> <li>Ensure adequate emergency preparedness and contingencies for foreseeable disruptive events</li> <li>Manage resources to optimum effect</li> <li>Develop policies, guidelines, procedures and standards to govern the management of risk locally</li> </ul>	<ul style="list-style-type: none"> <li>Design and apply controls to manage risk in line with the Board's appetite for taking risk</li> <li>Remain alert to risk</li> <li>Manage resources to optimum effect</li> <li>Develop and implement risk management plans</li> </ul>	<ul style="list-style-type: none"> <li>Undertake and keep up to date with mandatory training and other relevant training</li> <li>Follow policies, clinical standards and relevant procedures</li> <li>Act on lessons for learning</li> </ul>
Monitor	<ul style="list-style-type: none"> <li>Keep under review material risk exposures that are not accepted by the Board at each formal meeting</li> </ul>	<ul style="list-style-type: none"> <li>Challenge, support, supervise and hold colleagues to account for performance and continuous improvement</li> </ul>	<ul style="list-style-type: none"> <li>Monitor the operation of controls and address identified gaps in control</li> </ul>	<ul style="list-style-type: none"> <li>Supervise the work of others to ensure controls are applied correctly</li> </ul>	<ul style="list-style-type: none"> <li>Report concerns, defects, adverse events or failures to contain risk adequately.</li> </ul>
Audit	<ul style="list-style-type: none"> <li>Determine Audit priorities using a risk-based approach</li> <li>Take account of reports from the Audit Committee</li> </ul>	<ul style="list-style-type: none"> <li>Determine Audit Priorities using a risk-based approach</li> <li>Assist Internal Audit where required and ensure recommendations are acted upon by relevant colleagues</li> <li>Account for control of risk to the Audit Committee where required</li> </ul>	<ul style="list-style-type: none"> <li>Assist Internal Audit where required and ensure recommendations are acted upon by relevant colleagues</li> <li>Account for control of risk to the Audit Committee where required</li> <li>Undertake appropriate inspection/checks of controls for safety critical procedures</li> </ul>	<ul style="list-style-type: none"> <li>Cooperate fully and assist Internal Audit,</li> <li>Challenge recommendations if they are not agreed</li> <li>Develop and implement changes in practice within the timescales agreed</li> <li>Report when concluded.</li> </ul>	<ul style="list-style-type: none"> <li>Cooperate with Internal Audit and act on their findings</li> <li>Carry out instructions based on agreed audit recommendations</li> </ul>
Review	<ul style="list-style-type: none"> <li>Effectively hold those responsible for managing risk to account for performance and continuous improvement.</li> <li>Take decisions</li> </ul>	<ul style="list-style-type: none"> <li>Report to the Board all material risks and significant gaps in control</li> </ul>	<ul style="list-style-type: none"> <li>Report to the Board all material risks and significant gaps in control</li> <li>Escalate risk in accordance with this Policy</li> <li>Ensure all risks are reviewed correctly</li> </ul>

## 7 Training & Resources

Risks may be identified proactively by managerial review, analysis of incidents, complaints, claims or outcomes of safety inspection and/or audit. Root cause analysis may also be a source of risk identification. To ensure that all risks are identified, accurately described, appropriately controlled and consistently documented the following risk management tools are in place:

### a) Risk Register

The Risk Registers are presently recorded on paper based systems. Over the lifetime of this version of the policy (1.0) the Trust will move the organisation to electronic reporting. This will provide an effective mechanism for recording details of each risk within a database so that risk records can be analysed and facilitate effective oversight of risk management at all levels. When agreed all risk assessments must be entered onto the electronic system.. A template for the risk registers is shown as [appendix 7](#). Until then, all risks must be recorded in a locally held paper based risk register.

### b) Risk Management Training

This document recognises that training will be required to effectively manage risks in line with the process set out above. Details of all trust training programmes are set out in the Training Needs Analysis which can be found in the Mandatory Training Policy and associated documents.

- i) The Board of Directors and Senior Managers (which for the purpose of this policy are defined as Directors, Associate Medical Directors, General Managers, Clinical Leads and Assistant Directors) will receive training and/or briefings on the risk management process by the Risk Manager. In addition, supplementary briefings will be provided as required following publication of new guidance or relevant legislation.
- ii) All staff shall receive an introduction to the Risk Management Process briefing as part of the Corporate Induction programme.
- iii) Additional training will be provided through an e-learning programme which will be made available during 2015/16.
- iv) General, Ward and Departmental Managers together with the Assistant Directors of Nursing will have further more detailed risk management

process training incorporating how to use the electronic Risk Register database before access to the database is enabled.

- v) Staff designated to regularly undertake Root Cause Analysis will have the opportunity to undertake Root Cause Analysis training.

## **8 Monitoring and Audit**

The following indicators shall form the Key Performance Indicators by which the effectiveness of the Risk Management Process shall be evaluated:-

- All verified significant risks are reported to the Board of Directors at each formal meeting of the Board
- All significant risks are reported to and reviewed as a standing agenda item at each formal meeting of an Assurance Committee of the Board
- The risk profiles (for risks  $\geq 10$ ) for all Divisions are reviewed by the Risk Management & Corporate Governance Committee, at a frequency determined by them, as part of a rolling programme of reviews
- Local risk registers are in place, maintained and available for inspection at ward/departmental level
- Local risk registers show details of control, assurances, location, owner, action plan (where necessary) and  $\geq 80\%$  of risks are within review date and none are overdue for review by 6 or more months.

Compliance with the above will be monitored by the Risk Manager, reviewed by the Chief Risk Officer and reported within an annual report submitted to the Operations Board.

The following mechanisms will be used to monitor compliance with the requirements of this document:

- Evidence of reporting verified significant risk exposures to the Board of Directors at each formal meeting
- Evidence of review of significant risk exposure by the Risk Management & Corporate Governance Committee at each formal meeting of the committee
- Periodic internal audit of any or all aspects of the Risk Management process as determined by the Audit Committee (risk identification, assessment, control, monitoring and reviews)

## **9 Equality and Diversity**

Trust is committed to an environment that promotes equality and embraces diversity in its performance as an employer and service provider. It will adhere to legal and performance requirements and will mainstream equality and diversity principles through its policies, procedures and processes. This policy should be implemented with due regard to this commitment.

To ensure that the implementation of this policy does not have an adverse impact in response to the requirements of the Equality Act 2010 this policy has been screened for relevance during the policy development process and a full equality impact analysis conducted where necessary prior to consultation. The Trust will take remedial action when necessary to address any unexpected or unwarranted disparities and monitor practice to ensure that this policy is fairly implemented.

This policy and procedure can be made available in alternative formats on request including large print, Braille, audio, and different languages. To arrange this please refer to the Trust translation and interpretation policy in the first instance.

The Trust will endeavour to make reasonable adjustments to accommodate any employee/patient with particular equality and diversity requirements in implementing this policy and procedure. This may include accessibility of meeting/appointment venues, providing translation, arranging an interpreter to attend appointments/meetings, extending policy timeframes to enable translation to be undertaken, or assistance with formulating any written statements.

## **9.1 Recording and Monitoring of Equality & Diversity**

The Trust understands the business case for equality and diversity and will make sure that this is translated into practice. Accordingly, all policies and procedures will be monitored to ensure their effectiveness.

Monitoring information will be collated, analysed and published on an annual basis as part Equality Delivery System. The monitoring will cover the nine protected characteristics and will meet statutory duties under the Equality Act 2010. Where adverse impact is identified through the monitoring process the Trust will investigate and take corrective action to mitigate and prevent any negative impact.

The information collected for monitoring and reporting purposes will be treated as confidential and it will not be used for any other purpose.

## Appendix 1: Glossary of Terms used within Policy

Risk management will operate under a common language. Adopting standard risk management terms and definitions set out in the Risk Management Code of Practice (BS 31100:2008) will improve consistency and avoid confusion. Common terms may include:

<b>Board Assurance Framework</b>	A document setting out material risk and assurances on the operation of controls to manage those risks	<b>Risk</b>	Effect of uncertainty on objectives
<b>Control</b>	An intervention used to manage risk	<b>Risk acceptance</b>	Informed decision to take a particular risk
<b>Exposure</b>	Extent to which the organisation is subject to an event	<b>Risk aggregation</b>	Process to combine individual risks to obtain more complete understanding of risk
<b>Hazard</b>	Anything that has potential for harm	<b>Risk analysis</b>	Process to comprehend the nature of risk and to determine the level of risk
<b>Incident</b>	Event in which a loss occurred or could have occurred regardless of severity	<b>Risk appetite</b>	Amount and type of desirable risk the organisation is prepared to seek, accept or tolerate
<b>Inherent risk</b>	Exposure arising from a specific risk <u>before</u> any intervention to manage it	<b>Risk assessment</b>	Overall process of risk identification, risk analysis and risk evaluation
<b>Level of Risk</b>	Overall magnitude of a risk. It can be significant, high, moderate, low or very low.	<b>Risk avoidance</b>	Decision not to be involved in, or to withdraw from, an activity based on the level of risk
<b>Material Risk</b>	Most significant risks or those on which the Board or equivalent focuses	<b>Risk management</b>	Coordinated activities to direct and control the organisation with regard to risk
<b>Near Miss</b>	Operational failure that did not result in a loss or give rise to an inadvertent gain	<b>Risk owner</b>	Person or entity with the specific accountability and authority for managing the risk and any associated risk treatments
<b>Operational Risk</b>	The risk of loss or gain, resulting from internal processes, people and systems or from external events	<b>Risk Register</b>	A record of information about identified risks.
<b>Programme Risk</b>	Risk associated with transforming strategy into solutions via a collection of projects	<b>Target Risk</b>	A level of risk being planned for
<b>Residual risk</b>	Current risk. The risk remaining <u>after</u> risk treatment		

## Appendix 2: Calculating Residual Risk

This section describes how to score risks by estimating severity of impact and likelihood of occurrence using a standard 5x5 matrix. Each risk can be measured by multiplying the severity of harm and the likelihood of that harm occurring. This calculation will produce a **Residual Risk Score** that refers to **the amount of risk remaining after treatment**. The Trust uses a standard 5 x 5 scoring matrix set out below:

IMPACT (CONSEQUENCES) INDEX		LIKELIHOOD INDEX*		
5	Multiple deaths caused by an event; ≥£5m loss; May result in Special Administration or Suspension of CQC Registration; Hospital closure; Total loss of public confidence	5	Almost Certain	No effective control; or ≥1 in 5 chance within 12 months
4	Severe permanent harm or death caused by an event; £1m - £5m loss; Prolonged adverse publicity; Prolonged disruption to one or more Divisions; Extended service closure	4	Likely	Weak control; or ≥1 in 10 chance within 12 months
3	Moderate harm – medical treatment required up to 1 year; £100k – £1m loss; Temporary disruption to one or more Divisions; Service closure	3	Possible	Limited effective control; or ≥1 in 100 chance within 12 months
2	Minor harm – first aid treatment required up to 1 month; £50k - £100K loss; or Temporary service restriction	2	Unlikely	Good control; or ≥1 in 1000 chance within 12 months
1	No harm; 0 - £50K loss; or No disruption – service continues without impact	1	Rare	Very good control; or < 1 in 1000 chance (or less) within 12 months

\*Use of relative frequency can be helpful in quantifying risk, but a judgment may be needed in circumstances where relative frequency measurement is not appropriate or limited by data.

### Impact or Consequences

Impact is graded using a 5-point scale in which 1 represents the least amount of harm, whilst 5 represents catastrophic harm/loss. Each level of impact looks at either the extent of personal injury, total financial loss, damage to reputation or service provision that could result. Consistent assessment requires assessors to be objective and realistic and to use their experience in setting these levels. Select whichever description best fits.

### Likelihood

Likelihood is graded using a 5-point scale in which 1 represents an extremely unlikely probability of occurrence, whilst 5 represents a very likely occurrence. **In most cases likelihood should be determined by reflecting on the extent and effectiveness of control in place at the time of assessment, and using relative frequency where this is appropriate.**

### Differing Risk Scenarios

In most cases the highest degree of severity (i.e. the worst case scenario) will be used in the calculation to determine the residual risk. However, this can be misleading when the probability of the worst case is extremely rare and where a lower degree of harm is more likely to occur. For example, multiple deaths from medication error are an extremely rare occurrence, but minor or moderate harm is more frequently reported and may therefore have a higher residual risk. **Whichever way the residual risk score is determined it is the highest residual risk score that must be referred to on the risk register.**

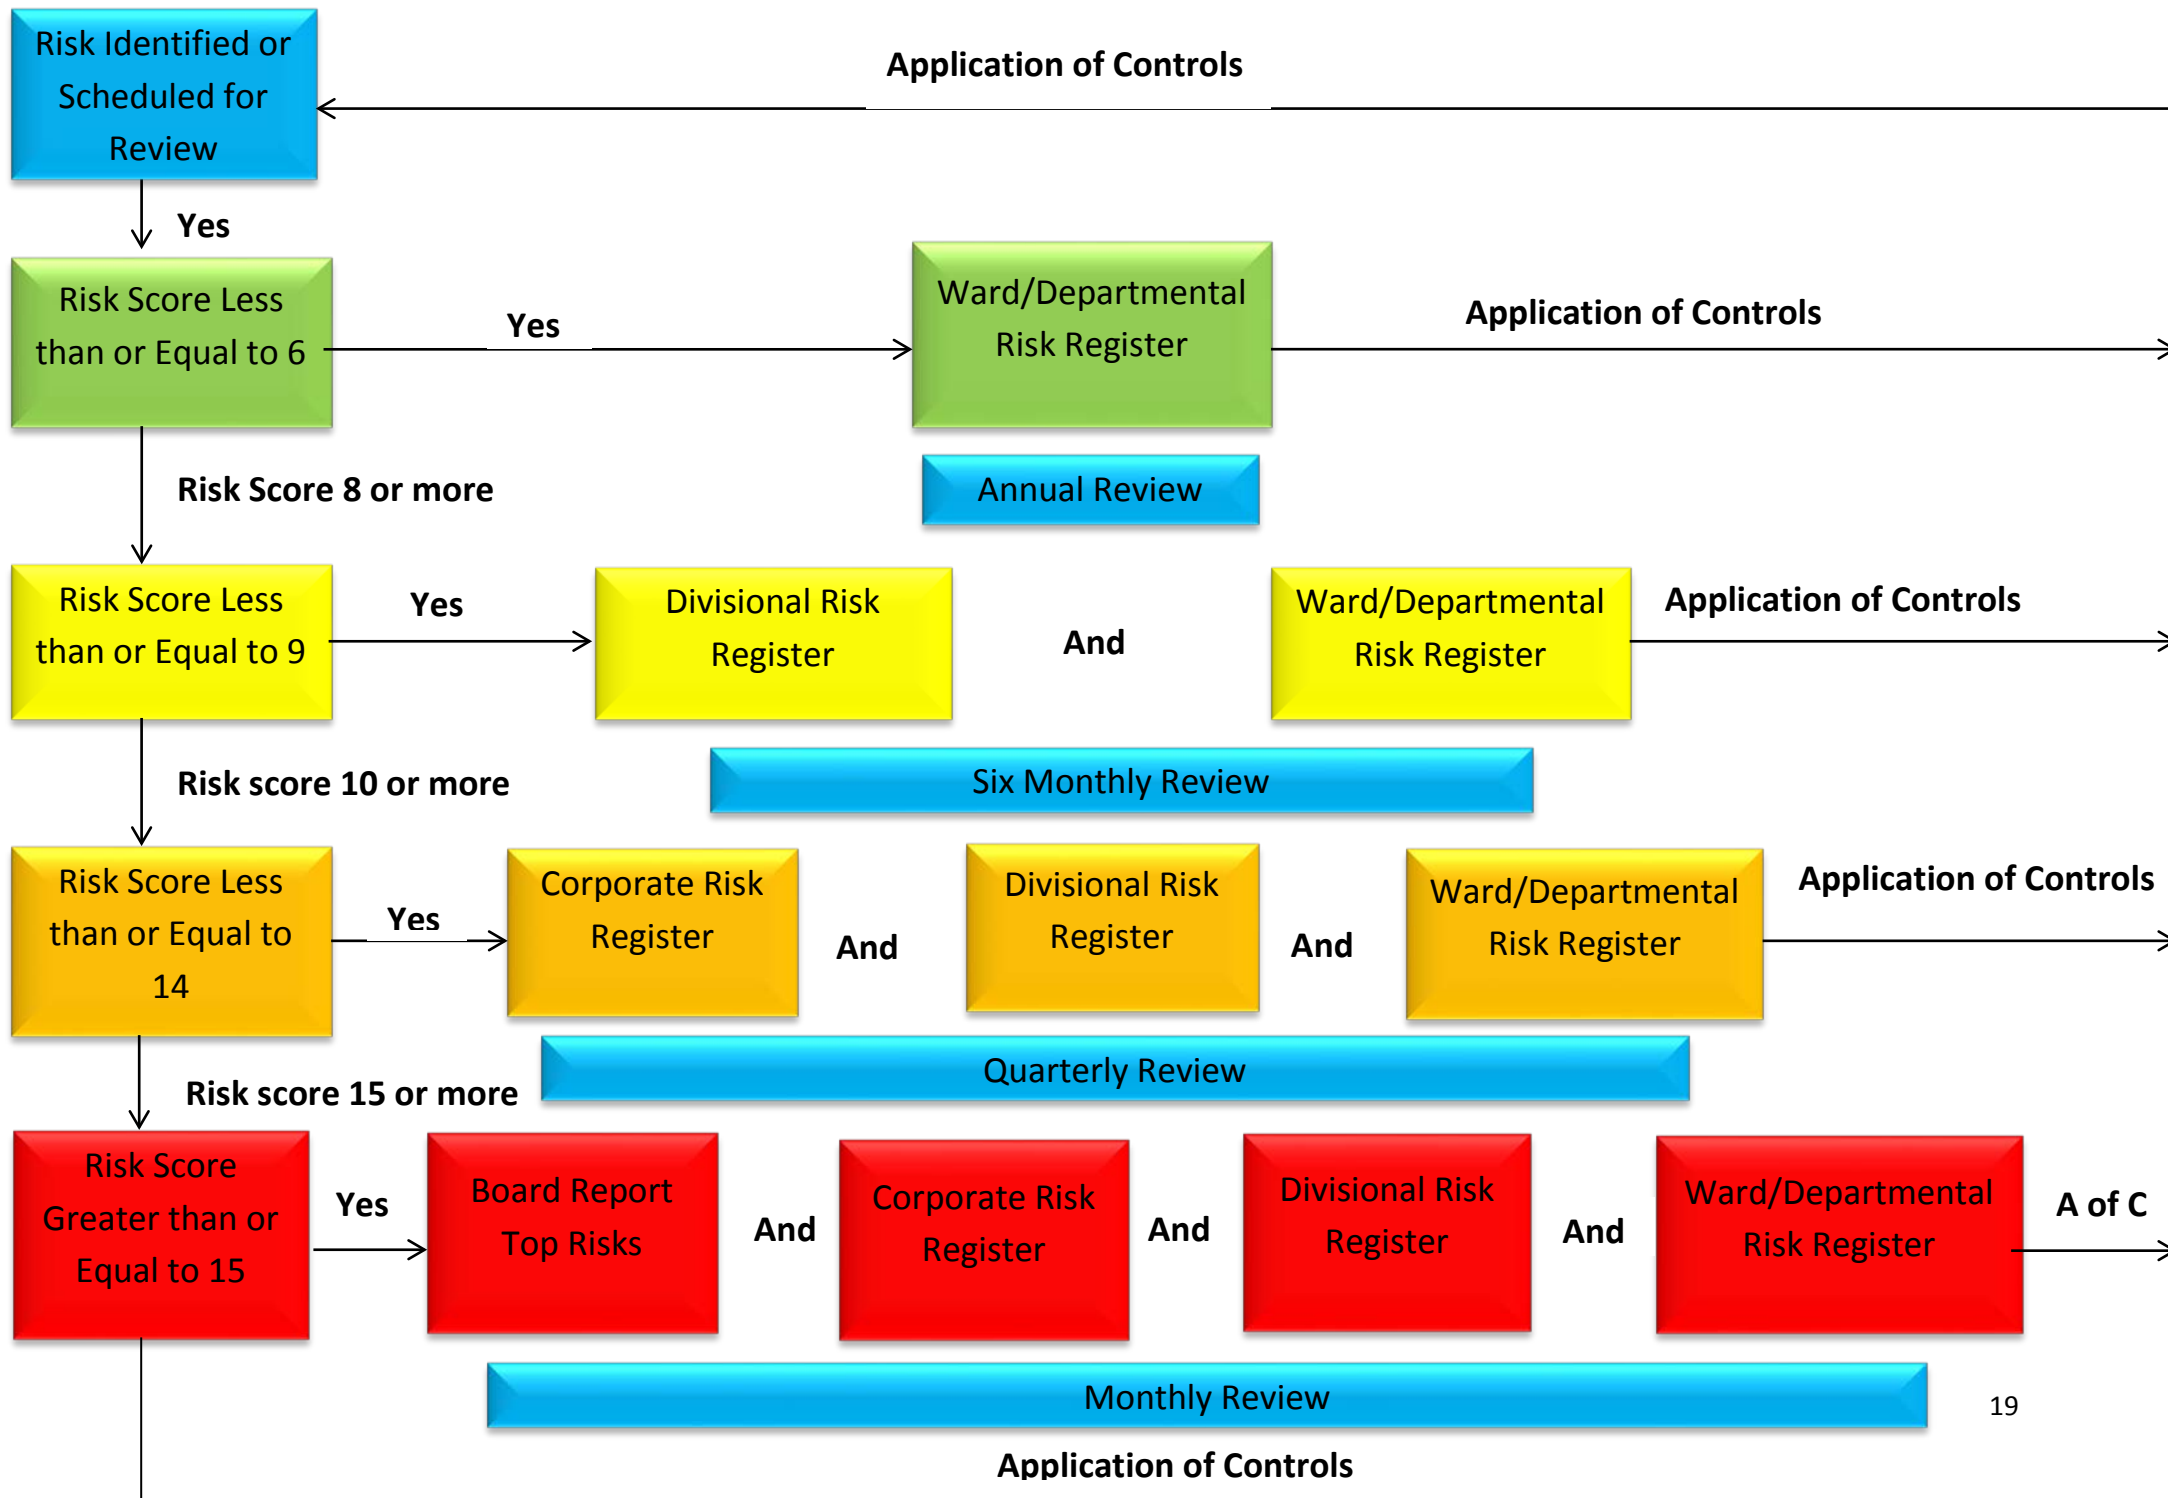

## Appendix 3: Risk Grading

SCORE	Incident / Risk Grade (NPSA Cat.)	Level of Risk	Communicated to and overseen by	Investigation Level
15 - 25	Catastrophic	<b>SIGNIFICANT</b>	Alert Chief Risk Officer or Manager Reported to Board of Directors	SI Procedures RCA – 45 days (Board notification)
10-14	Major	<b>HIGH</b>	Alert Divisional Management Team Reported to Risk Management & Corporate Governance Committee	Divisional RCA – 28 days
8 - 9	Moderate	<b>MEDIUM</b>	Inform Divisional Manager Overseen at Divisional Level	Divisional Analysis – 28 days
4-6	Minor	<b>LOW</b>	Inform Ward/Departmental Manager Oversee at Ward/Departmental Level	Ward/Department Analysis – 10 Days
1-3	Negligible	<b>VERY LOW</b>	Ward/Departmental Management	Ward/Department Analysis – 10 Days

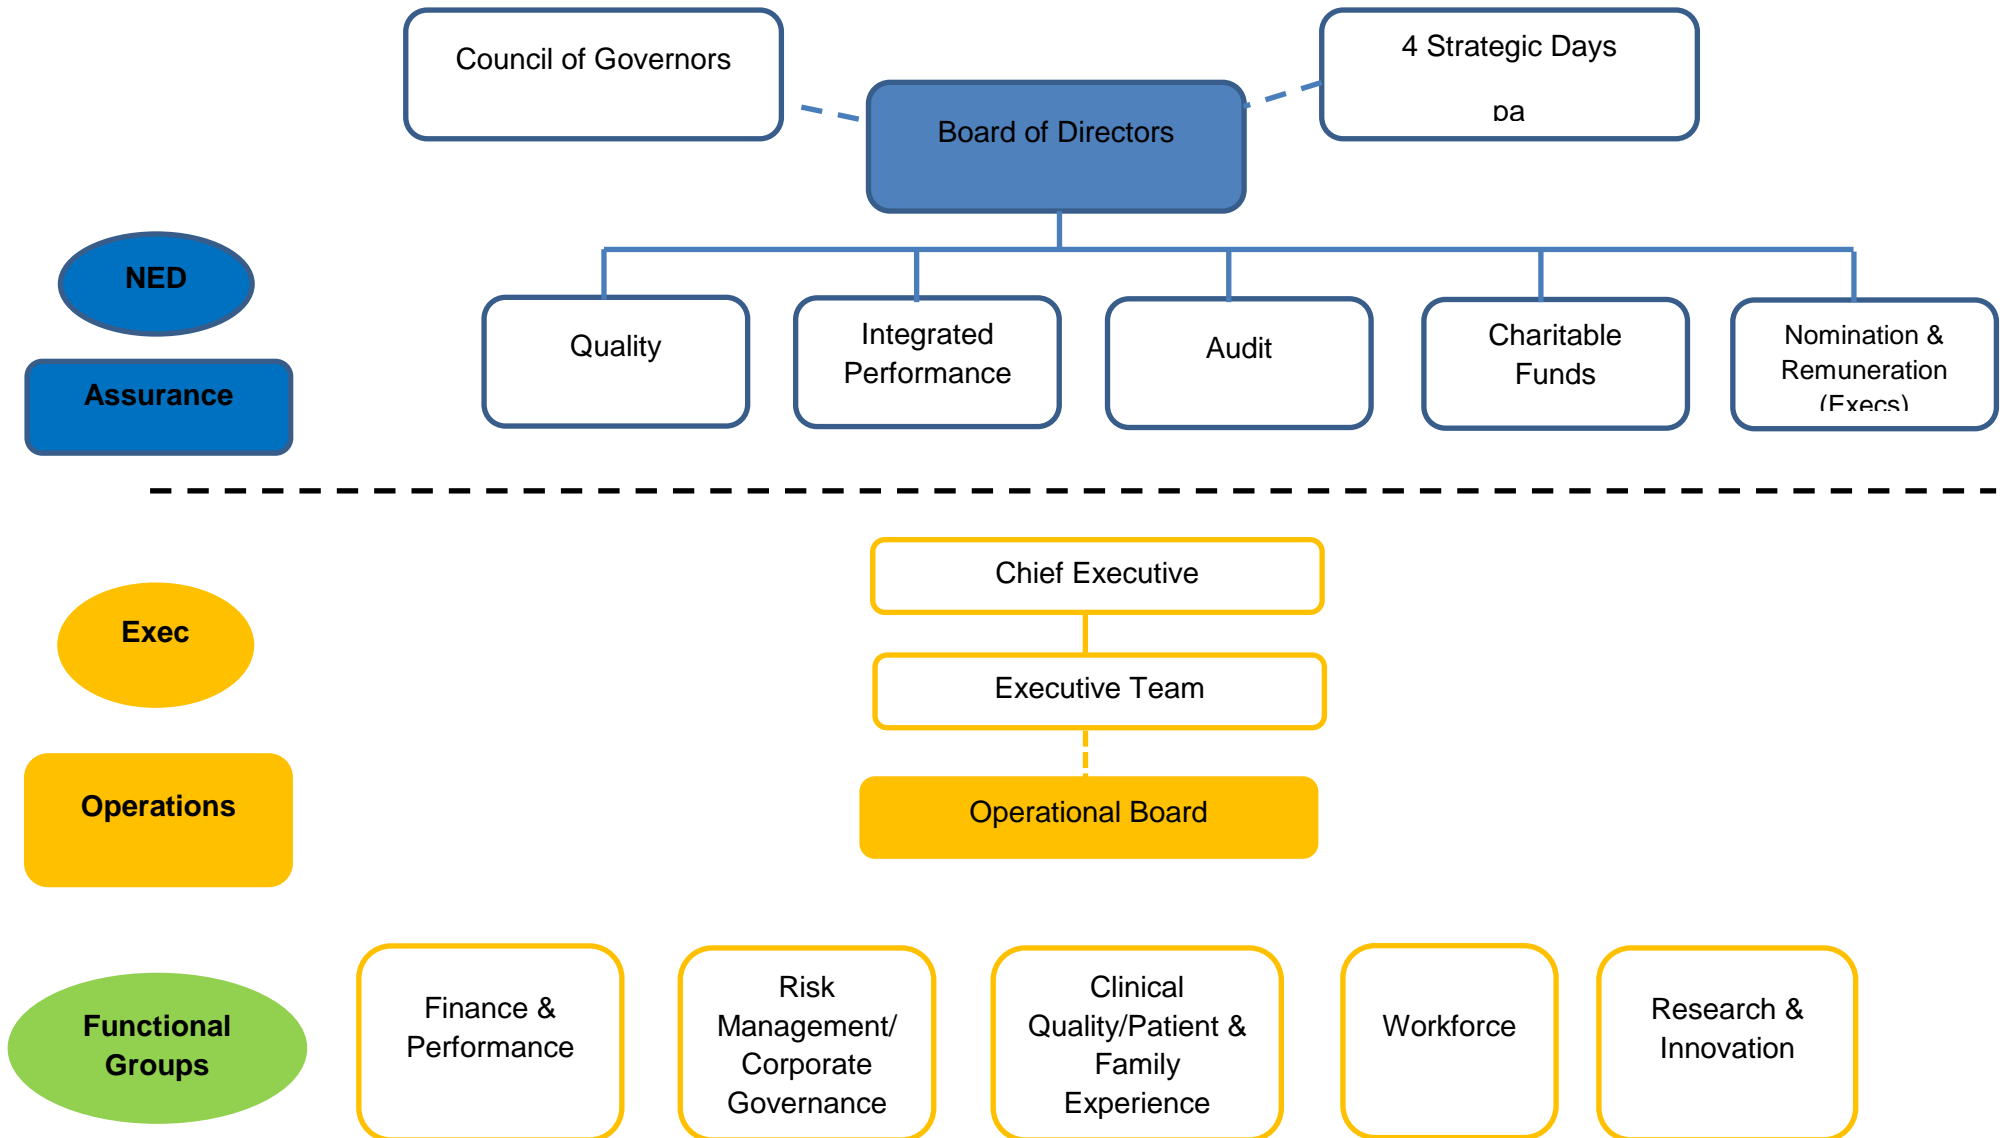

## 5X5 MATRIX

X	LIKELIHOOD					
IMPACT / CONSEQUENCE		1 Rare	2 Unlikely	3 Possible	4 Likely	5 Almost Certain
	5 Catastrophic	5	10	15	20	25
	4 Major	4	8	12	16	20
	3 Moderate	3	6	9	12	15
	2 Minor	2	4	6	8	10
	1 Negligible	1	2	3	4	5

## Appendix 4: Report Risk Flow Chart

## Appendix 5: Board Committee Structure

## Appendix 6: Risk Appetite and Risk Targets

The Trust recognises that its long term success depends upon the delivery of its strategic objectives. To be successful, the Trust must take risks, but in a managed way and to a level which is tolerable.

### Board of Directors approved Risk Appetite Statement:

“The Trust will aim to ensure the risk to patient and staff safety is kept as low as reasonably practicable and will not expose patients to risks they have not been properly informed of and agreed to take as part of their treatment. Regulatory breaches should only occur if absolutely necessary to protect our patients, staff or assets. However the Trust has a greater appetite to take considered risks in terms of their impact on other organisational issues. The Trust has the greatest appetite to take decisions that may expose us to additional scrutiny where there is clear evidence that benefits outweigh the risks. The Trust accepts the possibility of moderate financial loss from investments made for longer term benefit.”

### Making this Real for Staff

What follows are a series of 5x5 risk matrices, one for each domain of risk appetite. The risk limits for each domain has been superimposed as a heavily weighted black line. This represents the risk tolerance for this domain, whereby all relevant risks associated with this domain need to be managed to be at or below the risk tolerance. This sets a risk target for Managers to use in managing their risks. This provides an easy way of conveying to the operational front line what the Boards appetite is for risk, and will provide a focus for targeting the review of risks outside of tolerance by the Risk Management & Corporate Governance Committee.

#### Patient & Staff Safety

X	LIKELIHOOD					
IMPACT / CONSEQUENCE		1 Rare	2 Unlikely	3 Possible	4 Likely	5 Almost Certain
	5 Catastrophic	5	10	15	20	25
	4 Major	4	8	12	16	20
	3 Moderate	3	6	9	12	15
	2 Minor	2	4	6	8	10
	1 Negligable	1	2	3	4	5

#### Regulatory & Legal Compliance

X	LIKELIHOOD					
IMPACT / CONSEQUENCE		1 Rare	2 Unlikely	3 Possible	4 Likely	5 Almost Certain
	5 Catastrophic	5	10	15	20	25
	4 Major	4	8	12	16	20
	3 Moderate	3	6	9	12	15
	2 Minor	2	4	6	8	10
	1 Negligible	1	2	3	4	5

## Innovation, Quality, Outcomes, Service

X	LIKELIHOOD					
IMPACT / CONSEQUENCE		1 Rare	2 Unlikely	3 Possible	4 Likely	5 Almost Certain
	5 Catastrophic	5	10	15	20	25
	4 Major	4	8	12	16	20
	3 Moderate	3	6	9	12	15
	2 Minor	2	4	6	8	10
	1 Negligible	1	2	3	4	5

## Reputation & Credibility

X	LIKELIHOOD					
IMPACT / CONSEQUENCE		1 Rare	2 Unlikely	3 Possible	4 Likely	5 Almost Certain
	5 Catastrophic	5	10	15	20	25
	4 Major	4	8	12	16	20
	3 Moderate	3	6	9	12	15
	2 Minor	2	4	6	8	10
	1 Negligible	1	2	3	4	5

## Finance and Value for Money

X	LIKELIHOOD					
IMPACT / CONSEQUENCE		1 Rare	2 Unlikely	3 Possible	4 Likely	5 Almost Certain
	5 Catastrophic	5	10	15	20	25
	4 Major	4	8	12	16	20
	3 Moderate	3	6	9	12	15
	2 Minor	2	4	6	8	10
	1 Negligible	1	2	3	4	5

## Appendix 7: Risk Register Structure

The Trusts Risk Register will adopt the following structure:

Field Name	Description
Risk ID	Unique reference number
Risk Location	Ward or Department or Function
Risk Description	What is uncertain (the risk), what is its potential cause and what is the impact on objectives (the consequences)
Key Objective Affected	Quality, Patient & Family Experience Service & Innovation Finance & Value for Money Workforce Stakeholder Relationships
Date Risk Identified	
Date Risk Reviewed	
Risk Owner	Must be Executive Director, Divisional GM, AMD, Assistant Director or Nursing or Head of Department
Consequence	Scored using 5 x 5 matrix
Likelihood	Scored using 5 x 5 matrix
Risk Score	Consequence x Likelihood
Key Controls	Will likely be multiple controls to manage a risk
Control Type	Prevent / Treat, Detect, Contingency
Target risk score	Derived from risk appetite
Further mitigating actions	What more needs to be done to get risk score to target?
Internal Assurances	What reports or other evidence generated from within the organisation do we have that tells us how we are delivering the objective the risk is threatening the delivery of?
External Assurances	What reports or other evidence generated from outside the organisation do we have that tells us how we are delivering the objective the risk is threatening the delivery of?

## Appendix 8: Version Control

Version	Date	Comments	Author(s)
1.0	April 2015	Adoption of Paul Moore's policy adapted for LHCH	Mark Jackson, Chief Risk Officer Helen Martin, Risk Manager
1.2	April 2015	Addition of risk appetite and flowcharts to improve utility	Mark Jackson, Chief Risk Officer Helen Martin, Risk Manager

### Review Process Prior to Ratification:

Name of Group/Department/Committee	Date
Risk Management & Corporate Governance Committee	April 2015
Audit Committee	May 2015
Board	May 2015
