* Indicator 7. Percentage of staff believing that the organisation provides equal opportunities for career progression or promotion:
The results for the measure has been calculated differently in 2021 from previous years. In previous years, the percentage was reported was those saying 'yes' as a proportion of all staff *excluding those who said 'don't know'*. For this year's reporting, the figure reported is the percentage saying 'yes' as a proportion of all those who responded (including 'don't know'). This approach has been applied to the historical data in the 2021 reports.
