

UHL 2030 - Our five year plan

This document provides a concise summary of our UHL 2030 strategy. It sets out the key themes and priorities using clear wording, short explanations and supportive visuals, offering an accessible overview of our long-term plan. For full details and further information, the complete UHL 2030 strategy is available separately.

What is this leaflet about?

This leaflet explains:

Who we are

Why we need a plan

What we will do over the next five years

How services will improve for our population

Who are we?

We are the NHS University Hospitals of Liverpool Group.

We are a group of hospitals in Liverpool

We care for people in Liverpool and nearby areas

Our hospitals are:

Aintree University Hospital

Broadgreen Hospital

Liverpool Heart and Chest Hospital

Liverpool University Dental Hospital

Liverpool Women's University Hospital

Royal Liverpool University Hospital

Why we need a plan for the future

We need a plan because:

Many people have long-term health problems

Some people wait too long for care

People in less well-off areas often live shorter lives

NHS services are very busy and we want care to be better, safer and faster.

The next five years

This plan shows what we want to do by 2030.

There are four main things we want to do

There are three things that will help us do them

We have four main things we want to do

1. Transforming services for our population

We will:

Help services work better together

Make it easier to move between hospitals and clinics

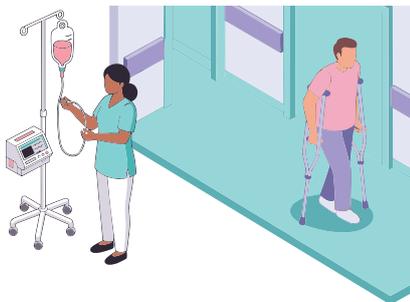

Improve specialist care, such as heart and maternity care

Provide more care closer to home

Help people get tests and treatment faster

Care that can only be provided in hospital

Provide more care closer to home

Improve diagnosis and treatment planning

2. Delivering outstanding care

We will:

Make care safe, quick and effective

Make sure care is fair for everyone

Use time, staff and money wisely

Meet NHS waiting time standards

3. Be a great place to work

We will:

- Support staff during change
- Train staff for the future
- Help staff feel respected and valued
- Create jobs for local people

4. Make the most of coming together

We will:

- Join up services where it helps patients
- Use one computer system for patient records
- Protect the environment
- Bring in extra money to support NHS care

We have three things that will help us make changes

1. Partnership working

We will work with:

- NHS teams
- GPs
- Councils
- Universities
- Community groups

2. Research and innovation

We will:

Offer more patients the chance to join research studies

Use new ideas, treatments and technology

Work closely with universities

3. Digital and data

We will:

Use one shared patient record system

Use digital tools to treat people faster

Keep patient information safe

Delivering the strategy

To make this plan happen:

We listened to staff, patients and local people

We will turn plans into clear actions

We will share updates

We will train and support staff

Thank you for reading
